

About Us

'At Express Telephony we provide quality business to business communication solutions for organisations throughout the United Kingdom. Our focus is on providing our customers with communications solutions that improve productivity and maximise their profitability.' With almost 25 years of specialised experience in the telecommunications industry, Express Telephony strive to provide the highest quality possible advice, assistance and support to help your business thrive in a highly competitive market place. We recognise that efficient communications are pivotal for every business or organisation to flourish. We also understand that no two businesses are the same, neither do they have the same business communication needs. What all businesses do have in common though is the need for reliable, good quality products at economical prices. Express Telephony are a small, approachable company and we welcome calls from businesses and organisations who are looking for advice - we appreciate that, with the vast diversity of available products, systems and services, looking for the right one for your company / organisation can be perplexing, time consuming and stressful! If you are not sure what your business needs to help improve your ability to communicate with your customers, call us and we will be happy to help. We specialise in the integration of computers and telephone systems and can also provide a range of new & used phone systems by manufacturers such as Avaya, Panasonic, Nortel BCM range, Nortel Meridian Range, Goldstar, LG, Toshiba and British Telecom to name but a few. All our systems come with the first years support free of charge (subject to signing a three year contract). Our used systems are also fully supported and can be installed onto existing structured wiring systems (CAT5e-CAT6e-Fibre). Express Telephony can also supply and install Computers, Servers, LAN & Wan services VPN and VoIP networks and can supply and configure Microsoft operating systems etc. "We believe it is our business to ensure that our clients' communications technology operates at optimum effectiveness and efficiency"
